

CHINA SCHOLARSHIP COUNCIL-YALE WORLD SCHOLARS

In the Combined Program in the
Biological & Biomedical Sciences
(BBS) 2014-2015

The first year of the combined program in the biological and biomedical sciences is fast-paced, exciting, and interdisciplinary. Training students to excel in his or her field is the long-term goal of Yale University's BBS Program.

BBS, a joint program between Yale University and the Chinese Government, is a highly competitive program that provides a unique opportunity for students to study in the United States and China. The program is designed to provide students with a strong foundation in the biological and biomedical sciences, as well as a deep understanding of the cultural and social context of these fields in China. Students who are accepted into the program will receive a full scholarship to cover tuition, room and board, and travel expenses. The program is open to students from all countries, and is particularly interested in students from developing countries. For more information, please visit the BBS website at www.bbs-yale.org.
