

量子磁学

Quantum magnetism

Prof. Wulfhekel, received his PhD in 1997 from Universiteit Twente in Niederlande. From 1998-2006, he worked as a senior scientist in Max-Planck-Institut für Mikrostrukturphysik in Germany. Since 2006, he became full professor in Karlsruhe institute of technology (KIT). Currently, he is the dean of education in institute of physics at KIT. Prof. Wulfhekel is one of the leading expert in the field of magnetic nanostructures and layered systems, spin-polarized electron transport, magnetism and antiferromagnetism at the atomic scale. He has published 118 papers including 5 Nature Journal papers and 16 PRLs.
